LTRS DEVELOPMENT AND LOCAL BUILDING RENOVATION INITIATIVES IN Ireland

POPULATION: 4,857,000
8 REGIONS, 31 PROVINCES
100 MUNICIPALITIES

1. Dublin (pilot city)
   - Population: 527,612
   - 11%

2. Cork
   - Population: 519,032
   - 11%

3. Fingal
   - Population: 273,991
   - 6%

4. South Dublin
   - Population: 265,205
   - 5%

5. Galway
   - Population: 250,653
   - 5%

Neither the EASME nor the European Commission are responsible for any use that may be made of the information contained therein.

This factsheet reflects information gathered through public sources and conversations with officials until January 2020.
Building regulations are a national competency in Ireland. While there is no formal process for consulting with regional and local authorities on building renovation policy, the same ministry (Department of Housing, Planning and Local Government) deals with both housing and local governments. Formal consultations between local and national authorities happen on a case-by-case basis, but informal consultation occurs regularly.

Regions and cities have launched various initiatives:

- The Eastern and Midlands, Southern, and Northern and Western regional assemblies have outlined building renovations as 2014-2020 priorities.
- Dublin City Council is upgrading social housing through its Fabric Upgrade Programme. Since 2013, over 8,000 units have been refurbished, resulting in significant energy and cost savings, and improved comfort levels for residents. Altogether, the programme has saved an estimated €29.6 million on energy bills to date.
- Under the national climate action plan, local authorities must upgrade any social housing more than 40 years old (which is 30% of the social housing stock) to class B2 of the Irish energy performance certificate.
- As part of a Climate Action Charter for Local Authorities being developed with SEAI, local authorities must commit to measuring the carbon impact of their activities and to deliver a 50% improvement in energy efficiency by 2030 compared to 2009.

Main challenges for LTRS implementation

- Limited resources to conduct a large-scale, comprehensive consultation process for the LTRS.
- Many actions (and consultations) are already taking place on specific topics (e.g. energy poverty, energy efficiency improvements in the public sector) but this information needs to be analysed and collated to build a coherent strategy.
