Commit
Commit to owning, operating, occupying and developing new and existing buildings to operate at net zero carbon by 2030.

Disclose
Disclose energy consumption, water, waste and scope 1, 2 and 3 carbon emissions in yearly Sustainability Accounts.

Act
Develop and implement a decarbonisation roadmap. This will include plans to improve energy efficiency, renewable energy production and energy recovery in all assets.

Verify
Verify portfolio level data relating to improvements in energy efficiency, renewable energy production and emissions through a third party in publicly available sustainability accounts. Pursue asset level green building certifications across portfolio.

Advocate
Raise awareness to visitors, tenants and other stakeholders by communicating sustainability actions both in Citycon centres and in corporate communications. Support tenants in making energy-wise decisions and collaborate with all business partners to achieve net zero by 2030.

Citycon is a leading owner, manager and developer of mixed-use centres for urban living including retail, office space and housing. They are committed to sustainable property management in the Nordic region with assets that total approximately EUR 4.4 billion. Citycon centres are located in urban hubs with a direct connection to public transport.
