EVORA GLOBAL
Real Estate Sustainability Consultancy

Commit
Commit to only occupying net zero carbon assets from 2020.

Disclose
Measure and disclose scope 1 and 2 GHG emissions at portfolio level on an annual basis and publicly publish data via annual report.

Act
Maintain carbon management strategy to proactively reduce demand and decarbonise the portfolio via implementation of energy efficiency measures, procurement of renewable energy, where possible, and use of offsets as a last resort.

Verify
Track impact and progress on carbon emissions reduction against targets, in line with recognised best practice standards and verified by a third party.

Advocate
Advocate for industry change and challenge traditional approaches to demonstrate both the necessity and business case for ensuring climate and ESG related risks are systematically assessed throughout the real estate investment process.

EVORA Global is a professional real estate sustainability consultancy. Since 2011, they have grown from 3 founding partners to over 60 passionate and empowered professionals. Their vision is to accelerate the adoption and evolution of real estate sustainability to enhance the wellbeing of the planet and its people. Their mission is to make buildings productive, profitable, and resilient.

3 buildings
250 m² total floor area
12.8 tCO₂e portfolio carbon emissions
