EXCOOL GROUP

Product Manufacturer

Tenant Owner

The Excool Group are providers of zero carbon heating and cooling solutions. Through Geo-Zero they are committed to becoming a pioneer for zero carbon heating and cooling of properties with zero carbon technology heat pumps and thermal storage batteries. They believe leading the way by example will lead others to adopt a zero carbon strategy.

3 buildings

14,000 m² total floor area

200 employees

1 Commit

Commit to all owned and occupied assets to be net zero by 2030.

2 Disclose

Disclose scope 1 and 2 carbon emissions via annual sustainability report from the Business Energy Efficiency Programme.

3 Act

Implement, with the assistance of the Business Energy Efficiency Programme, a roadmap to improve energy efficiency in assets with balance provided by either on-site or off-site renewable energy. Complete the installation of heat pumps to heat and cool assets, and thermal storage batteries to modulate renewable energy consumption.

4 Verify

Report annually on progress and verify emission reductions via a third party. Investigate methods for third-party verification of performance.

5 Advocate

Continue to advocate to wider industry including developers, house builders and other real estate professionals along with data centre clients on the benefits of working towards net zero and how Excool products can help decarbonise assets.
