

HILSON MORAN

Environmental Engineering Consultancy

Key Tenant

Hilson Moran is a leading environmental engineering consultancy for the built environment. Their design led strategic thinking puts health and wellbeing, and protection of the environment, at the heart of everything they do embracing creativity, innovation and technical rigour.

3 assets

4,000 m² total floor area

217 tCO₂e portfolio carbon emissions

200 employees

1 Commit

Commit to only occupying assets that are net zero carbon in operation by 2030.

2 Disclose

Measure and disclose annual energy consumption plus scope 1 and 2 emissions within annual reporting and make publicly available on the Hilson Moran website.

3 Act

Implement a detailed roadmap to reduce carbon emissions and increase renewably sourced energy within occupied assets.

4 Verify

Verify energy consumption and carbon emissions data annually via a third party, measure progress against targets and certify the company's Environmental Management Systems to ISO14001.

5 Advocate

Advocate for industry transformation by committing to promote, educate, and influence the property, construction, and real estate industry, collaborating with professional institutions and academia to deliver industry leading outcomes. Continue to introduce clients to building certification systems such as BREEAM and Design for Performance initiative. Expand outreach as part of the NABERS UK independent design review panel.
