MAX FORDHAM
Engineering and Sustainability Consultancy

Max Fordham LLP is a building services engineering and sustainability consultancy. For over 50 years, they have engineered energy, air, light and sound to bring buildings to life, working with leading architects on some of the world's greatest buildings. Their portfolio includes award-winning exemplars of sustainable design and a diverse mix of beautifully engineered buildings.

1 Commit
Commit to all occupied assets operating at net zero carbon from 2020.

2 Disclose
Continue to disclose the operational energy use of the business publicly via Max Fordham's website.

3 Act
Continue to reduce the carbon emissions of the business in accordance with the UKGBC Net Zero Carbon Framework, including reducing operational energy use, increasing renewable energy supply, and offsetting any remaining carbon. Work to deliver net zero carbon buildings for clients.

4 Verify
Continue to verify the net zero status of assets against the UKGBC Net Zero Carbon Framework and have this process reviewed by a third party.

5 Advocate
Continue to advocate through encouraging all clients to target net zero carbon for their buildings and through promoting net zero carbon in the UK built environment sector.

5 buildings
2,145 m² total floor area
73 tCO₂e portfolio carbon emissions
