

ADVANCING NET ZERO

Business | City | States & Regions

SALESFORCE

Cloud Computing Company

Tenant | Owner

Committed to mitigating its climate change impacts. In FY18, began providing a carbon neutral cloud to its customers, is halfway towards its goal of 100% renewable energy set in 2013, and has already achieved or is pursuing green building certification for 65% of its global office spaces. Ranked #2 on Barron's 2018 list of 100 Most Sustainable Companies.

240,000 tCO₂e portfolio carbon emissions

30,000+ employees

26 countries of operation

1 Commit

Committed to all new buildings from 2020, and all buildings by 2030, to operate at net zero carbon.

2 Disclose

Disclose Scope 1 and 2 (and relevant scope 3) greenhouse gas emissions via CDP and annual Stakeholder Impact Reports.

Act

By 2020, aim for major new office interiors to LEED Platinum v4 standard and to operate at net zero carbon. Achieve through a focus on energy efficiency, renewable energy procurement, and the embodied carbon of building materials. By 2022, achieve 100% Renewable Energy.

4 Verify

Workspaces are built to meet leading green building standards such as LEED, BREEAM, Fitwel, and Green Mark. FY18 emissions data and progress towards 100% renewable energy, Net-Zero GHG emissions, and Carbon Neutral Cloud commitments are assured by Ernst and Young.

5 Advocate

Partner with key suppliers to set their own Science-Based Targets and emissions reduction targets by 2025. Pursues green lease language and evaluates against four key criteria when procuring building materials.
