VARMING CONSULTING ENGINEERS LTD

Engineering and Sustainability Consultancy

🔑 Tenant

Varming Consulting Engineers are one of the leading mechanical, electrical and sustainability consultancies in Ireland. They provide high quality award winning design, specification and cost control services coupled with expert advice on sustainable solutions, supported by a tradition of design excellence and inspired by a spirit of innovation.

3 assets

659 m² total floor area

43.5 tCO₂e portfolio carbon emissions

56 employees

1 Commit

Commit to only occupying assets that are net-zero carbon in operation (scope 1 and 2) by 2030.

2 Disclose

Measure and disclose energy consumption and emissions data from operations and make public through annual CSR reporting and website.

3 Act

Develop a decarbonisation roadmap to improve occupied building performance prioritising scope 1 efficiency measures and engaging with landlords to influence scope 2 energy procurement thus reducing the requirement for offsets.

4 Verify

Verify energy consumption and carbon emissions data through established Environmental Management Systems certified to ISO 14001, with verification of data by an independent third party.

5 Advocate

Commit to reducing associated scope 3 emissions as far as is feasible by 2030. Facilitate the transformation of the wider industry by advocating that clients pursue net zero carbon buildings, sharing knowledge to enable them to achieve it, and encouraging them to make their own Net Zero Carbon Buildings Commitment.
