WSP UK

Multidisciplinary Professional Services Firm

WSP UK is part of one of the world’s largest multi-disciplinary professional services firms. Their aim is to futureproof cities and the environment. They plan, design, manage and engineer long lasting and impactful solutions to uniquely complex problems in the built and natural environment, designing an area of approximately 46 million ft² annually.

1. **Commit**
   Commit to only occupying net zero carbon operational assets by 2025.

2. **Disclose**
   Measure and disclose energy demand, scope 1, 2 and 3 carbon emissions publically in WSP UK’s sustainability report.

3. **Act**
   Continue to implement decarbonisation policies across asset portfolio. This includes agreeing green leases with landlords to proactively improve the environmental performance of buildings via energy efficiency measures, water, waste and emissions reduction. Continue to procure zero-carbon electricity and green gas across the estate.

4. **Verify**
   Verify energy consumption and carbon emissions data via ISO 14064-1 certification and undertake third party verification.

5. **Advocate**
   Continue to advocate for zero carbon standards with landlords, policy makers and wider industry through involvement in various professional bodies. 2025 commitment to net zero carbon for business operations also includes emissions from business travel, commuting and outsourced IT (data centres). WSP UK has committed to halve the carbon footprint of its designs and advice to clients by 2030 in an effort to strive for low carbon in all infrastructure.

37 assets
39,483 m² total floor area
872 tCO₂e portfolio carbon emissions
7,000 employees
